QUESTIONS ON THE SCHOOL SHARED FACILITIES

- Have the Schools figured out how to divide up access for the shared facilities and how will it be done so Students from either school can be given appropriate equal access.
    - If the split was based on Doubleview's shorter school hours it would give ISWA greater access given their longer days and less flexibility for Doubleview's School to Operate with.
    - If one school was to have just afternoons for oval access their students would be subject to the hotter time of day in summer continually.

- Will the outside courts be available during recess and lunch for both schools students to use?
    - If not, Students will miss out on this activity at recess/lunch which is enjoyed by students at other schools across the state.

- Given the proximity of Doubleview's Covered Assembly area to the outside hard courts there is a risk that use of these hardcourts could be disruptive to a Doubleview assembly.

- It has been stated in the Planning Applications "the proposed development will benefit the new Doubleview Primary School through access to high-quality shared facilities such as the proposed International School's sports hall and other specialist facilities that would not typically be available to public primary school students."
    - **Could the schools outline what the other specialist facilities are.**

REQUEST

A joint formal response from the Principals of ISWA and DVPS to P&C to the questions stated above.

ADDITIONAL OR SUPPORTING INFORMATION AND REFERENCES
